EXCELLENCE IN EVERY ENDEVOR

Our Aluminium Composite Panel designed (ACP) for exterior use offer a perfect blend of durability, aesthetics, and functionality. These specialized materials provide architects and builders with a versatile solution to enhance the appearance and resilience of building facades. With a range of styles, colors, and textures available, our exterior ACP not only elevate the visual appeal of structures but also ensure long-lasting performance in various weather conditions, making them a popular choice for modern architectural projects seeking both beauty and durability.

Fire Tough

W E S E R V E T O S A V E

WONDER FIRE
RETARDENT ACP'S
ARE AVAILABLE
ON DEMAND

HERE ARE FEW REASONS WHY WONDER FIRE TOUCH IS THE IDEAL CHOICE FOR INDOOR AND OUTDOOR APPLICATIONS.

In today's world, fire safety is a huge concern. The fire protection guidelines for the structure envelope can differ enormously from nation to nation. Nevertheless, they both share the objective of protecting the individuals living in the house. Therefore, particular emphasis is placed on the concept of the facade framework. The raw materials are modified and designed to counter fire & maintain a distance from huge disruption.

The building as a whole must also be considered in addition to the safety of individual building materials: wall structure, insulation, substructure, facade material, dimensioning, design, joining technology etc. these components and parameters influence the building's actions whenever a fire breaks out.
